## Absolute Mobile Solutions Delivers a Treasure

In 2007, La Mosca, a leading publisher of city games (location-based games) contracted Absolute Mobile Solutions to develop their newest game, Treasure of the Monks. The game was developed for the highly popular Symbian S60 platform. La Mosca treasured Absolute Mobile Solutions ability to deliver a high quality game within budget and on schedule.

## About Treasure of the Monks

In Treasure of the Monk, players embark on a treasure hunt with your team. Using cryptic descriptions, you go looking for the places where a medieval monk has hidden his gold coins. But look out for a gang that also wants your gold coins! Protect yourself against the gang by picking up virtual items in the game area, such as a sword, a horse or an extra base camp where you can keep your treasure. You can also buy virtual items from another team, but you have to demonstrate being a good negotiator to do that... Or go looking for the super treasure: collect four puzzle coins and then roll up your sleeves, because getting the super treasure isn't straight forward! This brand new treasure hunt game lasts a maximum of 4 hours and can be played in any city or over a large area.

Treasure of the Monks is a fun and fast paced game that combines the thrill of playing a classic game of scavenger hunt with the latest mobile technology.
